

Applications

Industry / Customer Group	Miscellaneous
Application	Access control - Light activation
Country	USA
Product	SMTR 7000 series
Variations	

Application

Details

The bollards are mounted with SMT/R 7000 sensors that are used to detect pedestrians or vehicles so that lights can be activated on the road. This could be cats' eye lights in the road or side street lights.

Typical sites can include,

- Pedestrian Crossings
- Railroad Crossings;
- Bridges (contra-flow lane delineation in conjunction with VMS or conventional overhead signage);
- Tunnels
- Speed Control
- Toll Plaza open/closed lane marking;
- Freight and Transportation terminals.
